(54) Title: COMPARTMENTALIZED CIGARETTE SNUFFER AND RECEPTACLE

(57) Abstract: A compartmentalized cigarette snuffer and receptacle (10) includes a container having a storage compartment sized to receive cigarettes and cigarette butts therein (16) and a cigarette snuffer compartment (14) containing mounted therein a heat sink (20) for extinguishing the lit end of a cigarette when inserted into the cigarette snuffer compartment (14). The storage and cigarette snuffer compartments are separated within the container by a dividing wall (18). Each compartment has a separate opening and a corresponding independently actuatable lid (32, 50) mounted thereon. Each lid is releasably closable for selective actuation by a user between an open position providing access to the corresponding the compartment, and a closed position sealing closed, in an air-tight fitment, the corresponding compartment.
